Linux Essentials

Tasks :-

1.Install Ubuntu (or any Linux distribution) on your system using a virtual machine tool like VirtualBox, and take a screenshot of your successful login to the Linux terminal.

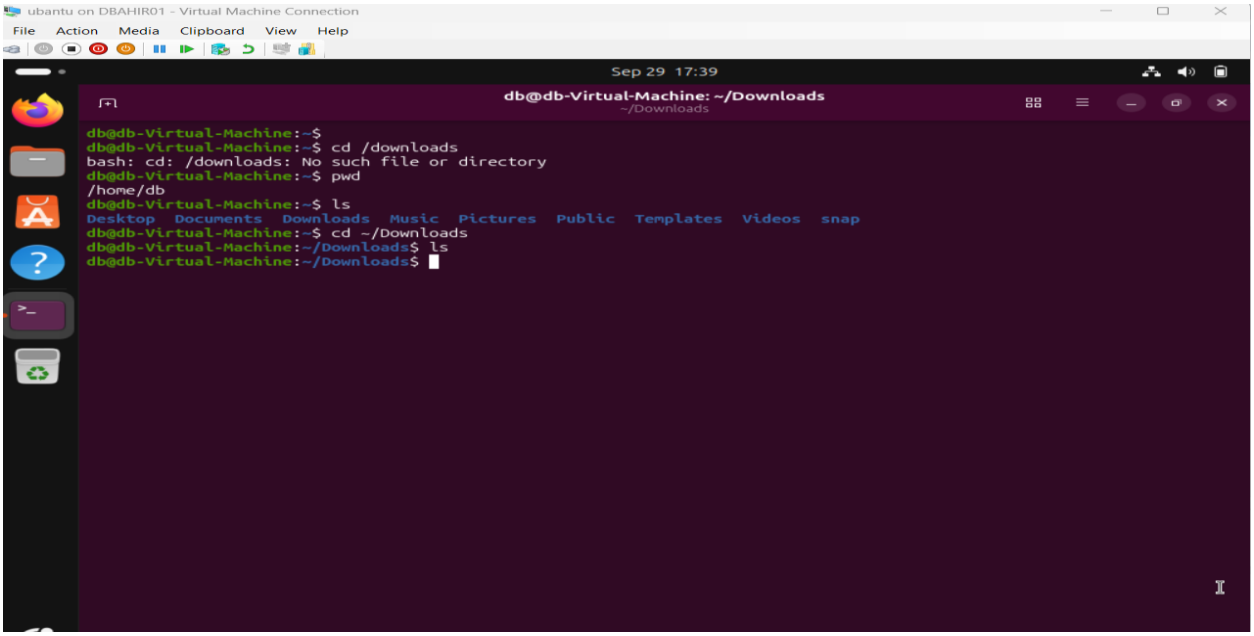

Ans :-

**2.Open the Linux terminal and use the commands pwd, ls, and cd to navigate to your Downloads folder, then list all files present in it.

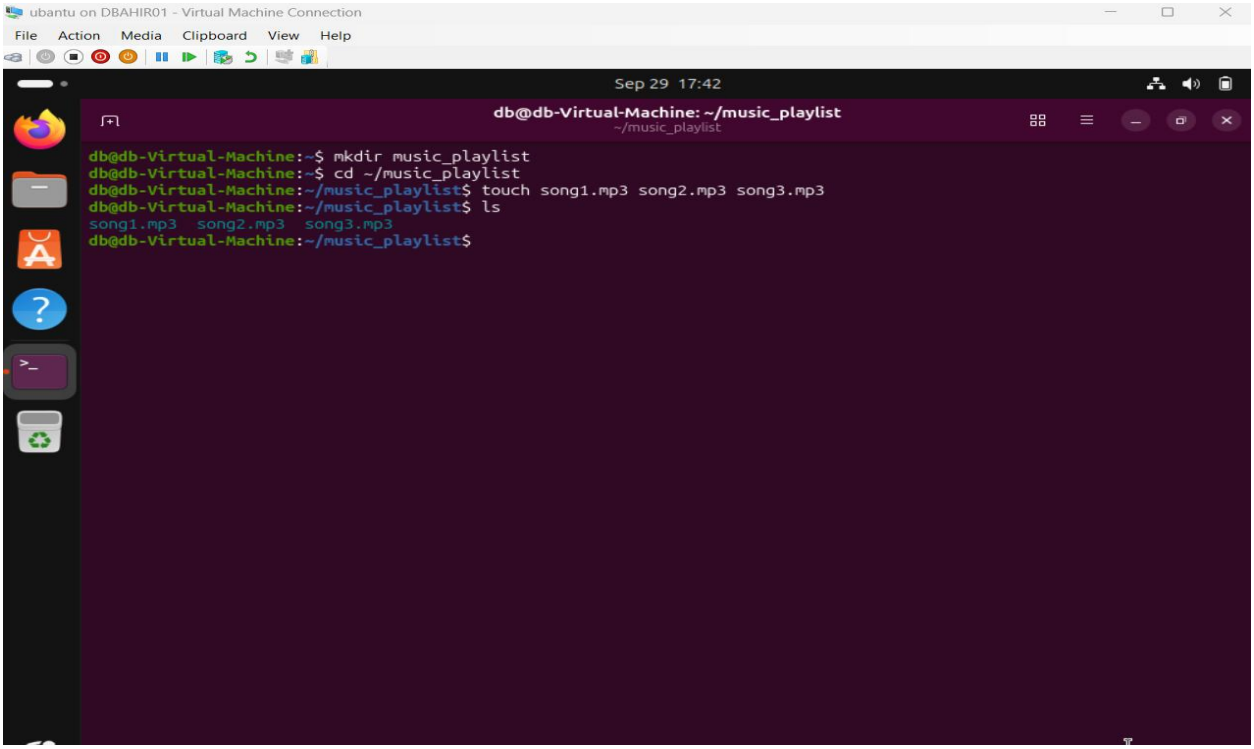

Hint: Use 'cd ~/Downloads' to move to the Downloads directory.**

Ans :-

3.Create a new directory named 'music_playlist' inside your home directory, and inside it, create three empty files named song1.mp3, song2.mp3, and song3.mp3 using a single Linux command.

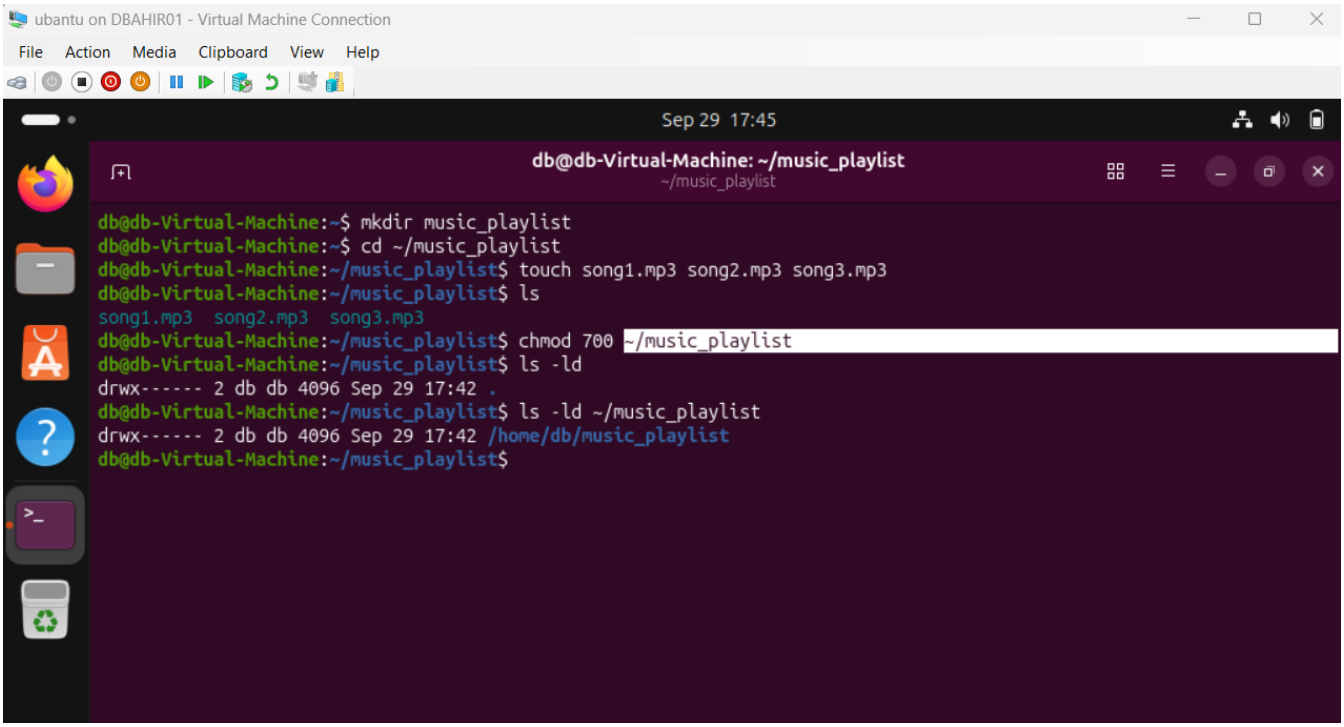

Ans :-

**4.Change the permissions of the 'music_playlist' directory so that only you (the owner) have read, write, and execute permissions, and no one else has any permissions.

Hint: Use the chmod command with the correct numeric code.**

Ans :-

5.Use the man command in the Linux terminal to find out what the 'grep' command does, and write a one-line summary in your own words.

Ans :-
