Operating system installation

Tasks:-

1.Download the latest Ubuntu Desktop ISO image and create a bootable USB drive using Rufus or Balena Etcher.

Ans :-

❖ Ubuntu Bootable USB – Step-by-Step

➢ **Step 1: Download Ubuntu**

1. Open your browser.
2. Go to ubuntu official website .
3. Download the Ubuntu Desktop ISO for 64-bit Intel/AMD.
4. Wait for the ISO download to complete.

➢ **Step 2: Insert USB**

1. Take an 8 GB or larger USB drive.
2. Connect it to your computer.
3. Backup important files from the USB because it will be erased.

➢ **Step 3: Download Rufus**

1. Go to Rufus Official Website
2. Download Rufus.
3. Run rufus.exe.

➢ **Step 4: Select USB in Rufus**

In Rufus:

- Device: Select your USB drive.
- Boot selection: Select Disk or ISO image.
- Click SELECT.
- Choose the downloaded Ubuntu .iso file.
- **Step 5: Set Rufus Options**

Use:

Device → Your USB

Boot Selection → Ubuntu ISO

Partition Scheme → GPT

Target System → UEFI
File System → FAT32

- **Step 6: Start Creating USB**

1. Click START.
2. If Rufus asks ISO Image mode / DD Image mode, select ISO Image mode.
3. Click OK.
4. Rufus will show a warning that all data on the USB will be erased.
5. Click OK.

- **Step 7: Wait**

Rufus will copy Ubuntu to the USB.
Wait until the progress reaches 100% and Rufus shows:
READY

- **Step 8: Safely Remove USB**

1. Close Rufus.
2. Safely eject the USB.
3. Your Ubuntu bootable USB is ready.

- **Step 9: Test Bootable USB**

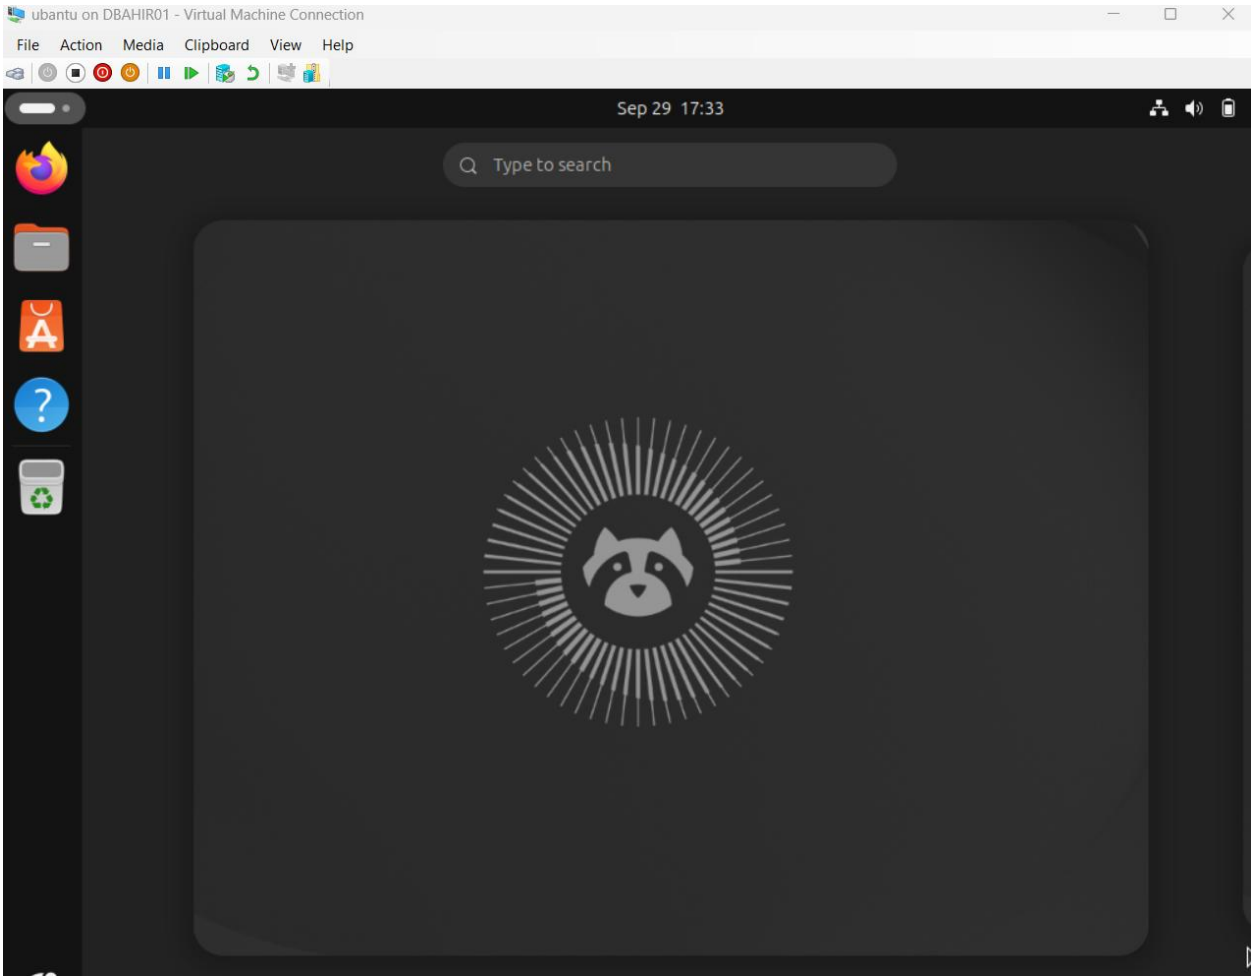

1. Restart your computer.
2. Press the Boot Menu key repeatedly while starting.
    - Dell: usually F12
3. Select:

UEFI: Your USB Drive

4. Press Enter.
5. Ubuntu boot menu should appear.

2.Install Ubuntu Desktop on a virtual machine using VirtualBox or VMware Player, and take a screenshot of the desktop after successful installation.

Ans :-

3.During installation, set up a user account named 'cyberstudent' with a strong password (at least 8 characters, mix of letters, numbers, and symbols).

Ans :-

4.After installing Ubuntu, open the terminal and run the command 'uname -a' to display OS details. Save the output to a text file named os-info.txt
