Windows security

Tasks :-

1.Open the Windows Defender Security Center on your laptop or desktop and take a screenshot showing the status of Virus & Threat Protection, Firewall & Network Protection, and App & Browser Control.

Ans :-

2.Create a new user account on your Windows system and set a strong password that meets at least 3 out of 4 complexity requirements (uppercase, lowercase, number, special character).

Ans :-

- **Steps to Create a New User Account in Windows 11**
    1. Press Windows + I to open Settings.
    2. Click Accounts.
    3. Select Other users.
    4. Click Add account.
    5. Select I don't have this person's sign-in information.
    6. Click Add a user without a Microsoft account.
    7. Enter a new username, such as Dbahir01.
    8. Create a strong password.
    9. Confirm the password.
    10. Set three security questions and answers.
    11. Click Next to create the account.
    12. Sign out and verify that the new account appears on the login screen.

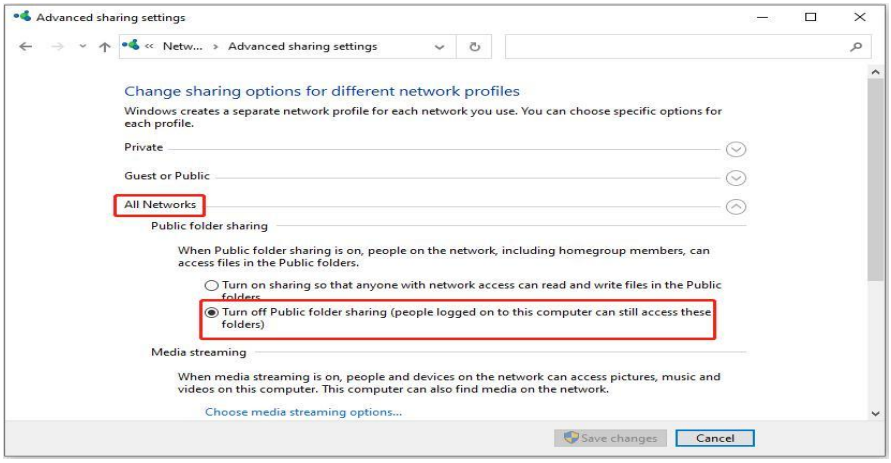

- **My password format:** Dbahir@2006

**3.Disable file sharing for the Public folder in Windows and verify that it is no longer accessible from another device on the same network.

Hint: Use the 'Advanced sharing settings' in the Network and Sharing Center.**

Ans :-

- **Steps to Disable Public Folder Sharing in Windows 11**
    1. Press Windows + R.
    2. Type control and press Enter.
    3. Open Network and Sharing Center.
    4. Click Change advanced sharing settings.
    5. Expand All networks.
    6. Find Public folder sharing.
    7. Select Turn off Public folder sharing.
    8. Click Save changes.
    9. Restart your computer if required.
- **Verify Public Folder Sharing :-**
    I. Open File Explorer and enter \\localhost in the address bar.
    II. Check the available shared folders.
    III. From another device on the same network, open File Explorer.
    IV. Enter \\Your-PC-Name or \\Your-IP-Address.
    V. Verify that the Public folder is no longer listed or accessible through the network share.
- **Sreenshot :-**

**4.Configure the Windows Firewall to block all incoming connections for a specific app of your choice (for example, Spotify or Chrome) and test that the app cannot access the internet.

Hint: Go to Windows Defender Firewall > Allow an app or feature through Windows Defender Firewall, and adjust the settings.**

Ans :-

- **Steps :-**
  1. Press Windows + R.
  2. Type wf.msc and press Enter.
  3. Select Inbound Rules from the left panel.
  4. Click New Rule on the right panel.
  5. Select Program and click Next.
  6. Select This program path.
  7. Browse and select the Chrome executable (chrome.exe).
  8. Click Next.
  9. Select Block the connection.
  10. Click Next.
  11. Select Domain, Private, and Public profiles.
  12. Enter the rule name: Block Chrome Incoming Connections.
  13. Click Finish.

- **Verification**
  a. Open Windows Defender Firewall with Advanced Security.
  b. Select Inbound Rules.
  c. Confirm that Block Chrome Incoming Connections is enabled.
  d. Open Chrome and browse a website to verify internet access.
